SUMMARY

Computer Science student (GPA: 3.94/4.00) at Diponegoro University blending rigorous engineering with human-centric design. My core philosophy is simple: **I love to build things with others, and I really want to make something wonderful.** Alongside winning national IT, UI/UX, and business case competitions, I understand the technical side of building systems as Co-founder and CTO at Aksa. I want to join the Apple Developer Academy to learn from the way Steve Jobs built products so I can know how to truly make something wonderful.

EDUCATION

Diponegoro University

Bachelor's degree, Computer Science

2023 - Present

GPA: 3.94 of 4.0

Relevant Coursework: Platform-Based Development, Human-Computer Interaction, Software Engineering, Object-Oriented Programming, Machine Learning.

EXPERIENCE

Co-founder & CTO

Aksa

Jan 2026 – Present

Semarang, Indonesia

- Co-founded a social upskilling platform centered on creator-led communities, owning the entire technical roadmap and architecture.
- Partnered directly with the Chief Executive Officer to translate high-level business vision into product features and deployment strategies.
- Onboarded 24+ credible creators and acquired 715+ users within the initial months of the platform launch.

Product Engineer (Project-based)

Lazuardy Tech

Nov 2025 – Apr 2026

Semarang, Indonesia

- Delivered end-to-end full-stack solutions using Next.js and Nest.js while reducing feature delivery time by 40% through AI agent-assisted workflows.
- Architected a dynamic client-facing landing page integrated with a custom CMS, optimizing assets to improve page load speeds by 35%.
- Collaborated to build a comprehensive Point of Sale system for a retail client, successfully developing 20+ secure API endpoints for inventory tracking.

Product Engineer (Project-based) | Lapor FSM!

Unit Pengelola dan Pelayanan Teknologi Informasi (UP2TI) FSM UNDIP

Jan 2026 – Mar 2026

Semarang, Indonesia

- Executed the end-to-end 0-to-1 development of a multi-portal emergency ecosystem within a 2-person team from kickoff to production in 3 months.
- Engineered role-based access control for 5 distinct user groups with real-time data coordination via WebSockets to orchestrate critical safety workflows.
- Deployed the system to cover over 3,000 potential campus users while maintaining sub-100ms API endpoint latency for emergency alert dispatches.

Backend Developer JavaScript Path | IDCamp 2024 Cohort

Indosat Ooredoo Hutchison Digital Camp

Sep 2024 – Jul 2025

Remote

- Selected as 1 of 100 Expert-tier participants from 13,056+ applicants for an advanced JavaScript backend engineering track.
- Mastered production-level backend engineering and cloud infrastructure through 318+ hours of intensive curriculum, deploying scalable RESTful APIs using Node.js, Express, Docker, and AWS CloudFormation.

Machine Learning Engineer Path | DBSFCC 2024 Cohort

Jan 2024 – Dec 2024

DBS Foundation Coding Camp (DBSFCC)

Remote

- Earned 1 of 150 Expert designations within a highly competitive national pool of 61,000+ applicants for the advanced machine learning track.
- Completed a rigorous 301-hour curriculum mastering end-to-end Machine Learning workflows and MLOps, building and deploying predictive models using TensorFlow, scikit-learn, and Docker pipelines.

Front-End Web Developer Path | IDCamp 2023 Cohort

Sep 2023 – May 2024

Indosat Ooredoo Hutchison Digital Camp

Remote

- Secured a highly competitive placement as 1 of only 75 Expert-tier participants selected from 19,897+ national applicants for the intensive front-end web engineering track.
- Invested 296+ hours mastering modern JavaScript, responsive user interfaces, and performance optimization, integrating robust unit and E2E testing via Jest and Cypress.

PROJECTS

CalmPulse BP

watchOS Application | SwiftUI, Xcode, State Machine Architecture, Layered Architecture

- Built a watchOS stress management app featuring a six-state dynamic routing architecture.
- Designed a low-friction interface with a sixty-second breathing countdown and mood logging.
- Used a layered architecture to separate application domain states from user interface views.

Teman Tuli

iOS App & Backend API | SwiftUI, Apple Speech Framework, Fastify, TypeScript, PostgreSQL

- Created an accessibility app for Deaf students to convert classroom discussions into live captions.
- Utilized Apple Speech and AVFoundation frameworks for a privacy-first transcript saving workflow.
- Built a full-stack Fastify monorepo with PostgreSQL that won a national UI/UX competition award.

HONORS & AWARDS

Grantee of Program Pembinaan Mahasiswa Wirausaha (P2MW) 2026, *Kemendiktisainstek RI*, May 2026

2nd Place Winner at Business Case Competition MCE ITB 2025, *ITB*, Dec 2025

Google Student Ambassador (Campus Leader for AI Adoption), *Google*, Sep 2025

Winner, Best Graduation Night Study Case Team, *COMPFEST 17 (Universitas Indonesia)*, Sep 2025

Gold Medalist at iCE-CInno 2024 (University Undergraduate Category), *UMPSA*, Dec 2024

BSI Scholarship Prestasi 2024 Awardee, *PT Bank Syariah Indonesia Tbk.*, Nov 2024

1st Place in the GDSC UI's 2024 UI/UX Mini Competition, *GDSC Universitas Indonesia*, Jun 2024

GDSC UNDIP 2023 Capstone Project Winner, *Google Developer Student Club Diponegoro University*, Jun 2024

3rd Place in the National UI/UX Competition ITFEST 2023, *HMIF Politeknik Negeri Samarinda*, Nov 2023

SKILLS

Product Engineering & Tech: Swift, SwiftUI, Xcode, Next.js, Nest.js, ElysiaJS, Bun, Node.js, Express, Golang, Python, PostgreSQL, RESTful APIs, TensorFlow, scikit-learn, MLOps, Docker, AWS.

Product Strategy & Management: Product Management, Product Roadmapping, Product Requirements Document (PRD), Agile/Scrum, Business Case Analysis, Market Fit Validation, Stakeholder Alignment, AI Agent Integration.

Philosophy & Meta-Skills: Product Taste, High-Agency Execution, Pattern Recognition, Human Interface Guidelines (HIG), UI/UX Design, Figma Prototyping.

Languages: Bahasa Indonesia (Native), English (Professional Working Proficiency).
